_*The art of* PANORAMA

A small device with endless possibilities. When it comes to producing panoramic photography, the **_CAN** has no equal. Creating a spherical or cylindrical panorama is very simple. **_CAN** can be controlled from your mobile phone or tablet using intuitive software (Android, iOS). But it can also do so much more. It can easily be turned into a platform for spin photography – jewellery, shoes, glasses, mobile phones, etc. in 360° animated images for your website or online shop.

© PHOTOROBOT 2017 | ALL RIGHTS RESERVED

CONNECTING A SECOND _CAN UNIT ENABLES THE CAMERA TO BE ROTATED IN BOTH AXES AND PRODUCES IMPRESSIVE SPHERICAL PANORAMAS, 3D IMAGES, ETC.

WiFi

HORIZONTAL ROTATION CAN BE ADJUSTED WITH ACCURACY TO TENTHS OF A DEGREE THANKS TO PRECISE STEPPING

INTUITIVE MANAGEMENT APPLICATION AVAILABLE FOR ANDROID AND IOS

_PANORAMA

A precise device such as the **_CAN** allows the generation of a panoramic photograph by combining dozens to hundreds of pictures, thus creating images which would be impossible using any other method. The shooting series is easy to set up with precision thanks to the intuitive interface for mobile phones and tablets. Up to two connected **_CAN** units can be controlled simultaneously, enabling rotation in the X and Y axis. All this in a small, compact design which comfortably fits into a camera bag.

_SPIN PHOTOGRAPHY

PhotoRobot **_CAN** is truly a convertible device. Thanks to a plate made of acrylic glass, it can easily transform into a platform for animated spin photography. Jewellery, electronics, shoes, fashion accessories – anything you need to present from all sides. The shooting series is easy to set up with precision thanks to an intuitive interface for mobile phones and tablets. You can select the number of photos to create a smooth animation, or shoot individual trishots or multishots from any angle.

VARIOUS ADDITIONAL PARTS CAN BE CONNECTED SIMPLY BY PLUGGING THEM INTO _CAN

ARM FOR INTERLINKING WITH A SECOND _CAN UNIT ENABLES THE CAMERA TO BE ROTATED IN BOTH AXES AND PRODUCES IMPRESSIVE SPHERICAL PANORAMAS, 3D IMAGES, ETC.

ADJUSTABLE HEAD ALLOWS PRECISE SETTING OF THE NUMBER OF PHOTOS WITHIN A SINGLE ROTATION

_CAN CAN BE USED FOR LONG PERIODS OF TIME WITHOUT ACCESS TO A POWER NETWORK. THE DEVICE HAS SLOTS FOR 12 BATTERY CELLS – BUT WHEN TRYING TO SAVE ON WEIGHT, THE MACHINE CAN WORK WITH ONLY 6 BATTERIES INSTEAD

ACRYLIC GLASS PLATE QUICKLY TRANSFORMS THE DEVICE INTO A PLATFORM FOR 360° PRODUCT SPIN PHOTOGRAPHY. YOU CAN CHOOSE THE NUMBER OF PICTURES YOU WANT TO CREATE A SMOOTH PRESENTATION, OR CAPTURE SIMPLE TRISHOTS OR MULTISHOTS

POWER SUPPLY/RECHARGING VIA A MICRO USB CONNECTOR. IF NO POWER SUPPLY IS AVAILABLE, ACCUMULATORS CAN BE REPLACED BY BATTERIES

INTUITIVE MANAGEMENT APPLICATION AVAILABLE FOR ANDROID AND IOS

BUILT-IN CONTROL AND WEB SERVER, CONTROL VIA A WEBSITE FROM A MOBILE PHONE, TABLET OR COMPUTER – OVER A WIFI NETWORK CREATED DIRECTLY BY THE _CAN.

_SINGLE SOFTWARE PRODUCT TO CONTROL THE ENTIRE STUDIO

PhotoRobot **_CONTROLS** software suite, boasting a modern intuitive design, is the best comprehensive studio management available on the market. It is used to remotely control the entire workplace (robots, cameras, lighting), manage workflow and provide the necessary functionality for effective automation in the field of post-processing.

Using **_CONTROLS** saves you time while also giving you an advantage over the competition thanks to its higher quality image output.

_CONTROLS is multi-platform and mobile – whether you use macOS, Windows or Linux, iOS, Android or Windows Mobile.

The availability of features depends on which programme version is used. Find out more at www.photorobot.com.

_QUALITY IS KEY

PhotoRobot devices are made by people who also use them.

They therefore know very well that only well designed things can do a lot of complex work for us and still be simple to use. Only then can we achieve the highest efficiency.

Our goal is to continuously improve.

PhotoRobot devices are the result of ceaseless internal development. We make sure that our robots are user-friendly yet last long even under high load.
That is why we have chosen a heavy-duty design. All parts are made in the EU.
We guarantee quality.

TECHNICAL SPECIFICATIONS

PROPERTIES	**CANAPP**	universal web application (iOS, macOS, Windows, Android)
	CAMERAS COMPATIBLE WITH CANAPP	with cable shutter release
	ICONTROLS[1]	Windows, macOS
	CONTROL SOFTWARE CONNECTION	WiFi
	CAMERAS COMPATIBLE WITH ICONTROLS	Canon, Nikon
	LIGHTING	Flash or constant
PARAMETERS	**BATTERY TYPE**	rechargeable AAA
	CHARGING ADAPTER	USB charger with 2 A output
	DIMENSIONS	170 (height) × 70 (diameter) mm / 6.7" × 2.8"
	WEIGHT (WITHOUT BATTERIES)	1,080 g / 2.4 lbs
	WEIGHT (WITH BATTERIES)	1,240 g / 2.7 lbs
CONFIGURATION[2]	**MANUAL TURNING SET**	3,200 g / 7.1 lbs
	ROBOTIC TURNING SET	4,400 g / 9.7 lbs
	MANUAL + MANUAL SET	3,500 g / 7.7 lbs
	ROBOTIC + MANUAL SET	4,650 g / 10.3 lbs
	ROBOTIC + ROBOTIC SET	6,200 g / 13.7 lbs
SUITCASE	**DIMENSIONS**	505 × 430 × 120 mm / 19.9" × 16.9" × 4.7"
	DIMENSIONS – TRANSPORT	510 × 435 × 140 mm / 20.1" × 17.1" × 5.5"
	WEIGHT	2,540 g / 5.6 lbs
	WEIGHT – TRANSPORT	2,920 g / 6.4 lbs
	ROBOTIC + ROBOTIC SET	6,200 g / 13.7 lbs
PLATE	**PLATE FOR TABLETOP PHOTOGRAPHY (WHITE)**	dia. 400 mm / dia. 15.8"

1 *Primarily when using plate for tabletop photography*
2 *Transport weight of the configuration, all including the suitcase*
